

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving
<b>[CN]</b> Connections	<b>[R]</b> Reasoning
<b>[ME]</b> Mental Mathematics and Estimation	<b>[T]</b> Technology
	<b>[V]</b> Visualization

<b>Strand:</b> Number		<b>General Learning Outcome:</b> Develop number sense.
<b>Specific Learning Outcomes</b> <i>It is expected that students will:</i>		<b>Achievement Indicators</b> <i>The following set of indicators <b>may</b> be used to determine whether students have met the corresponding specific outcome.</i>
7.N.1.	Determine and explain why a number is divisible by 2, 3, 4, 5, 6, 8, 9, or 10, and why a number cannot be divided by 0. [C, R]	<ul style="list-style-type: none"> <li>■ Determine if a number is divisible by 2, 3, 4, 5, 6, 8, 9, or 10, and explain why.</li> <li>■ Sort a set of numbers based upon their divisibility using organizers, such as Venn or Carroll diagrams.</li> <li>■ Determine the factors of a number using the divisibility rules.</li> <li>■ Explain, using an example, why numbers cannot be divided by 0.</li> </ul>
7.N.2.	Demonstrate an understanding of the addition, subtraction, multiplication, and division of decimals to solve problems (for more than 1-digit divisors or 2-digit multipliers, technology could be used). [ME, PS, T]	<ul style="list-style-type: none"> <li>■ Solve a problem involving the addition of two or more decimal numbers.</li> <li>■ Solve a problem involving the subtraction of decimal numbers.</li> <li>■ Solve a problem involving the multiplication or division of decimal numbers (for more than 1-digit divisors or 2-digit multipliers, technology could be used).</li> <li>■ Place the decimal in a sum or difference using front-end estimation (e.g., for <math>4.5 + 0.73 + 256.458</math>, think <math>4 + 256</math>, so the sum is greater than 260).</li> <li>■ Place the decimal in a product using front-end estimation (e.g., for <math>\\$12.33 \times 2.4</math>, think <math>\\$12 \times 2</math>, so the product is greater than \$24).</li> <li>■ Place the decimal in a quotient using front-end estimation (e.g., for <math>51.50 \text{ m} \div 2.1</math>, think <math>50 \text{ m} \div 2</math>, so the quotient is approximately 25 m).</li> <li>■ Check the reasonableness of answers using estimation.</li> <li>■ Solve a problem that involves operations on decimals (limited to thousandths), taking into consideration the order of operations.</li> <li>■ Explain, using an example, how to use mental math for products or quotients when the multiplier or the divisor is 0.1 or 0.5 or 0.25.</li> </ul>

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving
<b>[CN]</b> Connections	<b>[R]</b> Reasoning
<b>[ME]</b> Mental Mathematics and Estimation	<b>[T]</b> Technology
	<b>[V]</b> Visualization

<b>Strand:</b> Number ( <i>continued</i> )		<b>General Learning Outcome:</b> Develop number sense.
<b>Specific Learning Outcomes</b> <i>It is expected that students will:</i>		<b>Achievement Indicators</b> <i>The following set of indicators <b>may</b> be used to determine whether students have met the corresponding specific outcome.</i>
7.N.3.	Solve problems involving percents from 1% to 100%. [C, CN, ME, PS, R, T]	<ul style="list-style-type: none"> <li>Express a percent as a decimal or fraction.</li> <li>Solve a problem that involves finding a percent.</li> <li>Determine the answer to a percent problem where the answer requires rounding, and explain why an approximate answer is needed (e.g., total cost including taxes).</li> </ul>
7.N.4.	Demonstrate an understanding of the relationship between repeating decimals and fractions, and terminating decimals and fractions. [C, CN, R, T]	<ul style="list-style-type: none"> <li>Predict the decimal representation of a fraction using patterns (e.g., <math>\frac{1}{11} = 0.\overline{09}</math>, <math>\frac{2}{11} = 0.\overline{18}</math>, <math>\frac{3}{11} = ? \dots</math>).</li> <li>Match a set of fractions to their decimal representations.</li> <li>Sort a set of fractions as repeating or terminating decimals.</li> <li>Express a fraction as a terminating or repeating decimal.</li> <li>Express a repeating decimal as a fraction.</li> <li>Express a terminating decimal as a fraction.</li> <li>Provide an example where the decimal representation of a fraction is an approximation of its exact value.</li> </ul>

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving
<b>[CN]</b> Connections	<b>[R]</b> Reasoning
<b>[ME]</b> Mental Mathematics and Estimation	<b>[T]</b> Technology
	<b>[V]</b> Visualization

<b>Strand:</b> Number ( <i>continued</i> )		<b>General Learning Outcome:</b> Develop number sense.
<b>Specific Learning Outcomes</b> <i>It is expected that students will:</i>		<b>Achievement Indicators</b> <i>The following set of indicators <b>may</b> be used to determine whether students have met the corresponding specific outcome.</i>
7.N.5.	Demonstrate an understanding of adding and subtracting positive fractions and mixed numbers, with like and unlike denominators, concretely, pictorially, and symbolically (limited to positive sums and differences). [C, CN, ME, PS, R, V]	<ul style="list-style-type: none"> <li>■ Model addition and subtraction of positive fractions or mixed numbers using concrete representations, and record symbolically.</li> <li>■ Determine the sum of two positive fractions or mixed numbers with like denominators.</li> <li>■ Determine the difference of two positive fractions or mixed numbers with like denominators.</li> <li>■ Determine a common denominator for a set of positive fractions or mixed numbers.</li> <li>■ Determine the sum of two positive fractions or mixed numbers with unlike denominators.</li> <li>■ Determine the difference of two positive fractions or mixed numbers with unlike denominators.</li> <li>■ Simplify a positive fraction or mixed number by identifying the common factor between the numerator and denominator.</li> <li>■ Simplify the solution to a problem involving the sum or difference of two positive fractions or mixed numbers.</li> <li>■ Solve a problem involving the addition or subtraction of positive fractions or mixed numbers, and determine if the solution is reasonable.</li> </ul>
7.N.6.	Demonstrate an understanding of addition and subtraction of integers, concretely, pictorially, and symbolically. [C, CN, PS, R, V]	<ul style="list-style-type: none"> <li>■ Explain, using concrete materials such as integer tiles and diagrams, that the sum of opposite integers is equal to zero.</li> <li>■ Illustrate, using a horizontal or vertical number line, the results of adding or subtracting negative and positive integers (e.g., a move in one direction followed by an equivalent move in the opposite direction results in no net change in position).</li> <li>■ Add two integers using concrete materials or pictorial representations, and record the process symbolically.</li> <li>■ Subtract two integers using concrete materials or pictorial representations, and record the process symbolically.</li> <li>■ Solve a problem involving the addition and subtraction of integers.</li> </ul>

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving
<b>[CN]</b> Connections	<b>[R]</b> Reasoning
<b>[ME]</b> Mental Mathematics and Estimation	<b>[T]</b> Technology
	<b>[V]</b> Visualization

**Strand:**  
Number (*continued*)

**General Learning Outcome:**  
Develop number sense.

**Specific Learning Outcomes**  
*It is expected that students will:*

**Achievement Indicators**

*The following set of indicators **may** be used to determine whether students have met the corresponding specific outcome.*

- 7.N.7. Compare and order fractions, decimals (to thousandths), and integers by using
- benchmarks
  - place value
  - equivalent fractions and/or decimals
- [CN, R, V]

- Order the numbers of a set that includes fractions, decimals, or integers in ascending or descending order, and verify the result using a variety of strategies.
- Identify a number that would be between two numbers in an ordered sequence or on a horizontal or vertical number line.
- Identify incorrectly placed numbers in an ordered sequence or on a horizontal or vertical number line.
- Position fractions with like and unlike denominators from a set on a horizontal or vertical number line, and explain strategies used to determine order.
- Order the numbers of a set by placing them on a horizontal or vertical number line that contains benchmarks, such as 0 and 1 or 0 and 5.
- Position a set of fractions, including mixed numbers and improper fractions, on a horizontal or vertical number line, and explain strategies used to determine position.

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving
<b>[CN]</b> Connections	<b>[R]</b> Reasoning
<b>[ME]</b> Mental Mathematics and Estimation	<b>[T]</b> Technology
	<b>[V]</b> Visualization

<b>Strand:</b> Patterns and Relations (Patterns)		<b>General Learning Outcome:</b> Use patterns to describe the world and solve problems.
<b>Specific Learning Outcomes</b> <i>It is expected that students will:</i>		<b>Achievement Indicators</b> <i>The following set of indicators <b>may</b> be used to determine whether students have met the corresponding specific outcome.</i>
7.PR.1.	Demonstrate an understanding of oral and written patterns and their corresponding relations. [C, CN, R]	<ul style="list-style-type: none"> <li>■ Formulate a relation to represent the relationship in an oral or written pattern.</li> <li>■ Provide a context for a relation that represents a pattern.</li> <li>■ Represent a pattern in the environment using a relation.</li> </ul>
7.PR.2.	Construct a table of values from a relation, graph the table of values, and analyze the graph to draw conclusions and solve problems. [C, CN, R, V]	<ul style="list-style-type: none"> <li>■ Create a table of values for a relation by substituting values for the variable.</li> <li>■ Create a table of values using a relation, and graph the table of values (limited to discrete elements).</li> <li>■ Sketch the graph from a table of values created for a relation, and describe the patterns found in the graph to draw conclusions (e.g., graph the relationship between <math>n</math> and <math>2n + 3</math>).</li> <li>■ Describe the relationship shown on a graph using everyday language in spoken or written form to solve problems.</li> <li>■ Match a set of relations to a set of graphs.</li> <li>■ Match a set of graphs to a set of relations.</li> </ul>

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving
<b>[CN]</b> Connections	<b>[R]</b> Reasoning
<b>[ME]</b> Mental Mathematics and Estimation	<b>[T]</b> Technology
	<b>[V]</b> Visualization

<b>Strand:</b> Patterns and Relations (Variables and Equations)		<b>General Learning Outcome:</b> Represent algebraic expressions in multiple ways.
<b>Specific Learning Outcomes</b> <i>It is expected that students will:</i>		<b>Achievement Indicators</b> <i>The following set of indicators <b>may</b> be used to determine whether students have met the corresponding specific outcome.</i>
7.PR.3.	Demonstrate an understanding of preservation of equality by <ul style="list-style-type: none"> <li>■ modelling preservation of equality, concretely, pictorially, and symbolically</li> <li>■ applying preservation of equality to solve equations</li> </ul> [C, CN, PS, R, V]	<ul style="list-style-type: none"> <li>■ Model the preservation of equality for addition, subtraction, multiplication, or division using concrete materials or using pictorial representations, explain the process orally, and record it symbolically.</li> <li>■ Solve a problem by applying preservation of equality.</li> </ul>
7.PR.4.	Explain the difference between an expression and an equation. [C, CN]	<ul style="list-style-type: none"> <li>■ Identify and provide an example of a constant term, a numerical coefficient, and a variable in an expression and an equation.</li> <li>■ Explain what a variable is and how it is used in an expression.</li> <li>■ Provide an example of an expression and an equation, and explain how they are similar and different.</li> </ul>
7.PR.5.	Evaluate an expression given the value of the variable(s). [CN, R]	<ul style="list-style-type: none"> <li>■ Substitute a value for each unknown in an expression and evaluate the expression.</li> </ul>
7.PR.6.	Model and solve problems that can be represented by one-step linear equations of the form $x + a = b$ , concretely, pictorially, and symbolically, where $a$ and $b$ are integers. [CN, PS, R, V]	<ul style="list-style-type: none"> <li>■ Represent a problem with a linear equation and solve the equation using concrete models.</li> <li>■ Draw a visual representation of the steps required to solve a linear equation.</li> <li>■ Solve a problem using a linear equation.</li> <li>■ Verify the solution to a linear equation using concrete materials or diagrams.</li> <li>■ Substitute a possible solution for the variable in a linear equation to verify the equality.</li> </ul>

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving

	<b>[V]</b> Visualization

<b>Strand:</b> Shape and Space (Measurement)		<b>General Learning Outcome:</b> Use direct or indirect measurement to solve problems.
<b>Specific Learning Outcomes</b> <i>It is expected that students will:</i>		<b>Achievement Indicators</b> <i>The following set of indicators <b>may</b> be used to determine whether students have met the corresponding specific outcome.</i>
7.SS.1.	Demonstrate an understanding of circles by <ul style="list-style-type: none"> <li>describing the relationships among radius, diameter, and circumference of circles</li> <li>relating circumference to <math>\pi</math></li> <li>determining the sum of the central angles</li> <li>constructing circles with a given radius or diameter</li> <li>solving problems involving the radii, diameters, and circumferences of circles</li> </ul> [C, CN, R, V]	<ul style="list-style-type: none"> <li>Illustrate and explain that the diameter is twice the radius in a circle.</li> <li>Illustrate and explain that the circumference is approximately three times the diameter in a circle.</li> <li>Explain that, for all circles, <math>\pi</math> is the ratio of the circumference to the diameter (<math>\frac{C}{d}</math>), and its value is approximately 3.14.</li> <li>Explain, using an illustration, that the sum of the central angles of a circle is <math>360^\circ</math>.</li> <li>Draw a circle with a given radius or diameter with or without a compass.</li> <li>Solve a contextual problem involving circles.</li> </ul>
7.SS.2.	Develop and apply a formula for determining the area of <ul style="list-style-type: none"> <li>triangles</li> <li>parallelograms</li> <li>circles</li> </ul> [CN, PS, R, V]	<ul style="list-style-type: none"> <li>Illustrate and explain how the area of a rectangle can be used to determine the area of a triangle.</li> <li>Generalize a rule to create a formula for determining the area of triangles.</li> <li>Illustrate and explain how the area of a rectangle can be used to determine the area of a parallelogram.</li> <li>Generalize a rule to create a formula for determining the area of parallelograms.</li> <li>Illustrate and explain how to estimate the area of a circle without the use of a formula.</li> <li>Apply a formula for determining the area of a circle.</li> <li>Solve a problem involving the area of triangles, parallelograms, or circles.</li> </ul>

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving
<b>[CN]</b> Connections	<b>[R]</b> Reasoning
<b>[ME]</b> Mental Mathematics and Estimation	<b>[T]</b> Technology
	<b>[V]</b> Visualization

<b>Strand:</b> Shape and Space (3-D objects and 2-D shapes)		<b>General Learning Outcome:</b> Describe the characteristics of 3-D objects and 2-D shapes, and analyze the relationships among them.
<b>Specific Learning Outcomes</b> <i>It is expected that students will:</i>	<b>Achievement Indicators</b> <i>The following set of indicators <b>may</b> be used to determine whether students have met the corresponding specific outcome.</i>	
7.SS.3. Perform geometric constructions, including <ul style="list-style-type: none"> <li>■ perpendicular line segments</li> <li>■ parallel line segments</li> <li>■ perpendicular bisectors</li> <li>■ angle bisectors</li> </ul> [CN, R, V]	<ul style="list-style-type: none"> <li>■ Describe examples of parallel line segments, perpendicular line segments, perpendicular bisectors, and angle bisectors in the environment.</li> <li>■ Identify line segments on a diagram that are parallel or perpendicular.</li> <li>■ Draw a line segment perpendicular to another line segment, and explain why they are perpendicular.</li> <li>■ Draw a line segment parallel to another line segment, and explain why they are parallel.</li> <li>■ Draw the bisector of an angle using more than one method, and verify that the resulting angles are equal.</li> <li>■ Draw the perpendicular bisector of a line segment using more than one method, and verify the construction.</li> </ul>	

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving
<b>[CN]</b> Connections	<b>[R]</b> Reasoning
<b>[ME]</b> Mental Mathematics and Estimation	<b>[T]</b> Technology
	<b>[V]</b> Visualization

<b>Strand:</b> Shape and Space (Transformations)		<b>General Learning Outcome:</b> Describe and analyze position and motion of objects and shapes.
<b>Specific Learning Outcomes</b> <i>It is expected that students will:</i>		<b>Achievement Indicators</b> <i>The following set of indicators <b>may</b> be used to determine whether students have met the corresponding specific outcome.</i>
7.SS.4.	Identify and plot points in the four quadrants of a Cartesian plane using ordered pairs. [C, CN, V]	<ul style="list-style-type: none"> <li>■ Label the axes of a Cartesian plane and identify the origin.</li> <li>■ Identify the location of a point in any quadrant of a Cartesian plane using an ordered pair.</li> <li>■ Plot the point corresponding to a ordered pair on a Cartesian plane with units of 1, 2, 5, or 10 on its axes.</li> <li>■ Draw shapes and designs, using ordered pairs, in a Cartesian plane.</li> <li>■ Create shapes and designs in a Cartesian plane and identify the points used.</li> </ul>
7.SS.5.	Perform and describe transformations of a 2-D shape in all four quadrants of a Cartesian plane (limited to integral vertices). [C, CN, PS, T, V]	(It is intended that the original shape and its image have vertices with integral coordinates.) <ul style="list-style-type: none"> <li>■ Identify the coordinates of the vertices of a 2-D shape on a Cartesian plane.</li> <li>■ Describe the horizontal and vertical movement required to move from a given point to another point on a Cartesian plane.</li> <li>■ Describe the positional change of the vertices of a 2-D shape to the corresponding vertices of its image as a result of a transformation or successive transformations on a Cartesian plane.</li> <li>■ Perform a transformation or consecutive transformations on a 2-D shape, and identify coordinates of the vertices of the image.</li> <li>■ Describe the image resulting from the transformation of a 2-D shape on a Cartesian plane by comparing the coordinates of the vertices of the image.</li> </ul>

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving
<b>[CN]</b> Connections	<b>[R]</b> Reasoning
<b>[ME]</b> Mental Mathematics and Estimation	<b>[T]</b> Technology
	<b>[V]</b> Visualization

<b>Strand:</b> Statistics and Probability (Data Analysis)		<b>General Learning Outcome:</b> Describe and analyze position and motion of objects and shapes.
<b>Specific Learning Outcomes</b> <i>It is expected that students will:</i>		<b>Achievement Indicators</b> <i>The following set of indicators <b>may</b> be used to determine whether students have met the corresponding specific outcome.</i>
7.SP.1.	Demonstrate an understanding of central tendency and range by <ul style="list-style-type: none"> <li>determining the measures of central tendency (mean, median, mode) and range</li> <li>determining the most appropriate measures of central tendency to report findings</li> </ul> [C, PS, R, T]	<ul style="list-style-type: none"> <li>Determine mean, median, and mode for a set of data, and explain why these values may be the same or different.</li> <li>Determine the range of a set of data.</li> <li>Provide a context in which the mean, median, or mode is the most appropriate measure of central tendency to use when reporting findings.</li> <li>Solve a problem involving the measures of central tendency.</li> </ul>
7.SP.2.	Determine the effect on the mean, median, and mode when an outlier is included in a data set. [C, CN, PS, R]	<ul style="list-style-type: none"> <li>Analyze a set of data to identify any outliers.</li> <li>Explain the effect of outliers on the measures of central tendency for a data set.</li> <li>Identify outliers in a set of data and justify whether or not they are to be included in the reporting of the measures of central tendency.</li> <li>Provide examples of situations in which outliers would or would not be used in determining the measures of central tendency.</li> </ul>
7.SP.3.	Construct, label, and interpret circle graphs to solve problems. [C, CN, PS, R, T, V]	<ul style="list-style-type: none"> <li>Identify common attributes of circle graphs, such as               <ul style="list-style-type: none"> <li>title, label, or legend</li> <li>the sum of the central angles is 360°</li> <li>the data is reported as a percent of the total and the sum of the percents is equal to 100%</li> </ul> </li> <li>Create and label a circle graph, with or without technology, to display a set of data.</li> <li>Find and compare circle graphs in a variety of print and electronic media, such as newspapers, magazines, and the Internet.</li> <li>Translate percentages displayed in a circle graph into quantities to solve a problem.</li> <li>Interpret a circle graph to answer questions.</li> </ul>

## Grade 7

<b>[C]</b> Communication	<b>[PS]</b> Problem Solving
<b>[CN]</b> Connections	<b>[R]</b> Reasoning
<b>[ME]</b> Mental Mathematics and Estimation	<b>[T]</b> Technology
	<b>[V]</b> Visualization

<b>Strand:</b> Statistics and Probability (Chance and Uncertainty)		<b>General Learning Outcome:</b> Use experimental or theoretical probabilities to represent and solve problems involving uncertainty.
<b>Specific Learning Outcomes</b> <i>It is expected that students will:</i>		<b>Achievement Indicators</b> <i>The following set of indicators <b>may</b> be used to determine whether students have met the corresponding specific outcome.</i>
7.SP.4.	Express probabilities as ratios, fractions, and percents. [C, CN, R, T, V]	<ul style="list-style-type: none"> <li>■ Determine the probability of an outcome occurring for a probability experiment, and express it as a ratio, fraction, or percent.</li> <li>■ Provide an example of an event with a probability of 0 or 0% (impossible) and an event with a probability of 1 or 100% (certain).</li> </ul>
7.SP.5.	Identify the sample space (where the combined sample space has 36 or fewer elements) for a probability experiment involving two independent events. [C, ME, PS]	<ul style="list-style-type: none"> <li>■ Provide an example of two independent events, such as               <ul style="list-style-type: none"> <li>■ spinning a four-section spinner and an eight-sided die</li> <li>■ tossing a coin and rolling a twelve-sided die</li> <li>■ tossing two coins</li> <li>■ rolling two dice</li> </ul>               and explain why they are independent.             </li> <li>■ Identify the sample space (all possible outcomes) for an experiment involving two independent events using a tree diagram, table, or another graphic organizer.</li> </ul>
7.SP.6.	Conduct a probability experiment to compare the theoretical probability (determined using a tree diagram, table, or another graphic organizer) and experimental probability of two independent events. [C, PS, R, T]	<ul style="list-style-type: none"> <li>■ Determine the theoretical probability of an outcome for an experiment involving two independent events.</li> <li>■ Conduct a probability experiment for an outcome involving two independent events, with or without technology, to compare the experimental probability to the theoretical probability.</li> <li>■ Solve a probability problem involving two independent events.</li> </ul>
